

## AirFit™ N20 Nasal CPAP Mask

The AirFit N20 Nasal CPAP Mask is simple to put on and fit, without sacrificing performance, having InfinitySeal™ cushion technology allows for an advanced fit and unique seal at a vast range of pressures. With a soft, flexible frame and plush headgear with integrated padding this mask is comfortable, simple and effective.

### Features of the AirFit N20

- **Clear field of Vision:** The frame rests just below the eyes to keep line of sight open for reading or watching TV.
- **InfinitySeal™ Cushion:** The InfinitySeal Cushion is the most adaptive silicone cushion ResMed has designed. Specially designed loops and varying thickness levels prevent leaks and create a secure seal.
- **Soft Padded Frame:** The frame is flexible and soft to the touch with integrated padding to help avoid irritation,
- **Magnetic Clips and Quick Release Elbow:** The magnetic clips attach to the headgear and easily lock onto the mask frame, allowing headgear adjustments to remain in place. The quick release elbow allows for disconnection of the mask from the CPAP hose for times when you need to get up at night.
- **A short, flexible tube:** The flexible tube interconnects the elbow to the your tubing, giving you more freedom of movement.
