

AirMini™ AutoSet™ Travel CPAP Machine by ResMed

ResMed designed the all New Advanced AirMini AutoSet Travel CPAP Machine with all the features that ResMed is known for. The AirMini features the same proven therapy modes used in the AirSense™ 10.

The **AirMini Travel Machine is the World's Smallest CPAP Machine**, weighing less than a pound and fitting in the palm of your hand. Traveling has never been easier, no more dragging around the bulky heavy CPAP Machines. The size does not compromise any of the features or latest technologies that CPAP users are accustomed to in ResMed's CPAP Machines.

AirMini CANNOT be used with any other masks, tubing or humidifier systems. The waterless HumidX™ system is only included when pairing the AirMini with the AirFit™ N20 or the AirFit™ P10 and their tube adapters.
